stimulant/depressant combination, but it can also have an enhancing effect due to. Smoking Adderall with weed. Very little research has been conducted on the effects of smoking marijuana while taking Adderall. The side effects of Adderall can be similar to those produced by marijuana use however, and these include the following: abnormally fast heartbeat (tachycardia) anxiety; confusion; dizziness ; nausea; panic; The danger of using marijuana. Some persons who smoke Adderall may also combine it with other drugs like marijuana or alcohol.

Smoking a combination of these drugs can have poisonous effects on the brain and body. Mixing stimulants and depressants can lead to dangerous increases in heart rate and blood pressure and other chronic health consequences, such as overdose and addiction. The Fairburn officer wrote in the report that McCorvey admitted to smoking marijuana, taking Adderall and drinking a beer while driving the ambulance. McCorvey was arrested, taken to Fulton County. Connected with dopamine production and stimulation, the weed and Adderall combination can reduce some of the side-effects associated with use,. Using weed and Adderall at the same time is colloquially known as "Madderall", a slang term that combines the words marijuana and Adderall. The word marijuana is actually a Mexican slang term for cannabis, which was popularized by certain American papers during the 1930's.

The Potential Dangers of Mixing Adderall and Marijuana As stated, more research is needed to understand the effects of mixing marijuana and Adderall. However, there are ample subjective reports that suggest negative interactions. Long term use of either drug can impair the brains' ability to release dopamine or serotonin naturally. Smoking or snorting Adderall may also be regularly accompanied with alcohol or drug abuse. The Substance Abuse and Mental Health Services Administration (SAMHSA) published studies of fulltime college students who abused Adderall in the past year and found that alcohol, cocaine, marijuana, prescription painkillers, and tranquilizers were also commonly abused in the month. Adderall and weed interactions - smoking marijuana on adderall ok. Thread starter annabelle281; Start date Mar 1, 2018; A. annabelle281 New Member. Mar 1, 2018 #1 I have a prescription for Adderall 30 mg daily. I am wondering what would happen if I smoke weed while on Adderall.

My friends have told me that it can cause mental issues, but I don't see how that. Prescription medications like Adderall (amphetamine and dextroamphetamine), Ritalin and Concerta (methylphenidate) are commonly taken by ADHD patients, but very little research has been done on drug interactions with cannabis. One review of previous research found minimal research, but hypothesized if there were strong contraindications, we would likely see big. There is no good conclusion as to why; some say it's because smoking increases the effects of Adderall, since cigarette smoke contains stimulants, while others say that it's because it actually DECREASES the effects, ie, it counteracts the agitation of the stimulants in Adderall and therefore your body craves it to get you more normalized. Still others say it's the reverse;. Chemicals in marijuana called cannabinoids affect cardiovascular health. They can dilate blood vessels, raise resting heart rate and complicate heart pumping. According to a 2017 report by Harvard University, the risk for heart attack is much higher in the hour after smoking marijuana than it would be otherwise. Take Adderall and weed, for example. Smoking pot can help to improve your appetite while on Adderall, and taking Adderall while smoking weed can assist with eliminating the fogginess you experience while high. However, this isn't guaranteed for every consumer; some people find that taking two drugs exacerbates the harmful effects of both. Smoke adderall with weed. Common Questions and Answers about Smoke adderall with weed. adderall . Just like with any drug, you don't want to use it or be around it. They do test at your prenatal appointments with your urine. If your other can't smoke it just in her bedroom and out the window or just outside then is say she is

very inconsiderate of your baby and you. Read More.. Adderall has several common side effects: Trouble sleeping Anxiety Increased and rapid heart rate Headache Dizziness Marijuana, or weed, is a drug derived from the dried up flowers of the cannabis plant. It is considered a psychotropic drug which has been heavily researched for its medical properties. A Georgia ambulance driver admitted to smoking marijuana, taking Adderall and drinking beer before a rollover crash last week in which an unrestrained patient died, authorities said. In reference to weed making adderall useless, if I use adderall to study but finds himself done studying but the adderall not done working, I has found a consensus amongst friends of friends that weed not only neutralizes adderall, but in fact overpowers it and allows them to fall asleep if they lay down shortly after smoking. However, if they stay up past the duration of the high, the. For example, smoking weed for the relief of an Adderall come down is a form of compounding medications. There is something to remember when compounding. The Strain. The two strains of marijuana, Indica, and Sativa have transposing effects. Indica - offsets the Adderall effects due to its aiding in sleep and is better used at nighttime. For example, mixing Adderall and marijuana can lead to an increased risk of drowsiness, heart attack, stroke and lung cancer in addition to weakening the immune system. This combination of drugs causes users to experience increased energy and euphoria, which may encourage them to take dangerous risks. Because marijuana can initially lead to an increased heart rate and Adderall has the same effect, a person on both drugs may have a racing heart. Over time, this side effect could lead to cardiovascular problems, especially if there is already an underlying heart condition. Cannabis I took 20 mg of IR adderall about an hour ago. I've heard mixed things about smoking weed on adderall but I'm a big smoker and have a pre roll saved, how do these drugs combine? I've heard from some that it numbs the effects of the addy, but from others that it feels great. I'm also thinking about taking another 20. ^ Yup, smoking weed with a low tolerance can bring on anxious thoughts, especially thought-loop obsessive patterns, ime Also, amphetamines are terrible drugs to abuse. If you absolutely must abuse them, you are best off taking less than 10mg Adderall IR at a time, since the Levoamphetamine (28% of Adderall, the rest is 72% Dextroamphetamine) aspect of the drug. Mixing adderall and weed. Adderall is a stimulant. However, weed's properties and varying effects on individuals makes it harder to characterize. For example, some people may feel more relaxed and calm after smoking which presents more depressant effects. However, others may experience paranoia, increased heart rate or anxiety after smoking. Adderall and cannabis frequently cause an intense sensation of euphoria, and also cause our blood pressure and heart rate to rise. Mixing these substances isn't recommended for anyone who suffers from a heart condition. Just like with large quantities of THC, the combination of weed and Adderall can also trigger anxiousness and paranoia. Answer (1 of 9): Mixing substances is an awful idea but I've experienced this combination because I used to have a prescription for Adderall. Being on Adderall and marijuana is a very very weird experience. Imagine being wired and focused but being high on the strongest marijuana you've ever had. . Adderall and weed cannot be safely mixed despite the anecdotal evidence you might hear about. When combined, Adderall and cannabis use may lead to the development of long-term cardiovascular problems and substance abuse, which may. When it comes to Adderall, a combination of both when taken at the same time can make one extremely drowsy or lead to fatal conditions such as a stroke or heart attack because Adderall has been known to increase the heart rate, while cannabis can do the same in people who already have underlying heart conditions. Answer (1 of 5): Yes you can.. It's a waste of time though.. Most answers you'll get on here are from people who have never actually combined them at

the same time, only people who have taken Adderall or smoked weed bring together guesses of what might actually happen as far as interaction goes. . The U.S. government will tell you that Adderall is safer because it's a Schedule II substance while weed is a Schedule I substance; a drug with "no medical value," according to the Controlled Substances Act (1970). However, the long-term effects of Adderall are much worse than cannabis. They can include: Panic Attacks Hallucinations A Georgia paramedic confessed to smoking marijuana, popping Adderall and drinking beer before crashing his ambulance with a patient inside.
