"When Dana Plato died, it was widely reported in the press as an accidental overdose but when the Autopsy report became available the verdict was. " -Dr. Michael Hunter 19.05.2016 · Your body works to stay alive first, and to stay functioning second. When temperatures are at freezing, the body responds by basically constricting all blood vessels that are furthest away from the heart. These are vessels in the arms, legs, fingers and toes. This helps keep all the blood in the body around the organs.
